EXAMINER

HARBECK, TIMOTHY M

ART UNIT PAPER NUMBER

3628

DATE MAILED: 01/03/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b> 10/618,249	<b>Applicant(s)</b> BRAKE ET AL.	
	<b>Examiner</b> Timothy M. Harbeck	<b>Art Unit</b> 3628	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☐ Responsive to communication(s) filed on 11 July 2003.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) ☒ Claim(s) 1 and 35-59 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1 and 35-59 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 11 July 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

**Claim 1** is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,032,136. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1 of the pending application is substantially the same as claim 1 of the previous patent. The difference is that the pending application relates to a "value card" whereas the previous patent refers to a "multi-feature card". It would have been obvious to anyone skilled in the ordinary art at the time of invention to equate a value card with multiple features as claimed to be a "multi-feature card," because it performs more than one particular function.

Furthermore, the remaining scope of claim 1 in the pending application is a broader interpretation of the remaining scope of claim 1 in the previous patent. Because of this, the entire scope of the pending claims is covered by the previously

Art Unit: 3628

patented claims. Broadening the scope of the prior patent would have been obvious to anyone skilled in the ordinary art at the time of invention so that one could cover a wider range of the particular subject.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cunningham (US Pat 6,014,645) in view of "Visa, MBNA and De La Rue Launch Multi-Function Smart Card Program," De La Rue Pic 7/06/1998 (hereinafter De La Rue).

**Re Claim 1:** Cunningham discloses a real-time financial card application system wherein the system automatically processes a customer's application for a transaction card (Column 2, lines 9-29) comprising the steps of:

- Receiving said customer's request into said system (Column 2, lines 15-19)
- Providing at least one or more safety features to determine whether said customer is the person whose name is printed on said transaction card (Column 3, lines 23-26)
- Activating the transaction card by confirming the customers desire to activate the primary transaction card use

Art Unit: 3628

Cunningham does not explicitly disclose the steps of offering the options of activating the transaction card by

- Determining the customer's election to add a secondary credit card feature; and
- Identifying the customer's request to activate any additional features

De La Rue discloses a Visa smart card that will place the functions of several traditional bank cards onto a single microchip (single card). These additional features include a credit feature, a stored cash feature and a rewards program. It would have been obvious to anyone skilled in the ordinary art at the time of invention to include the teachings of De La Rue to the disclosure of Cunningham to create a real time credit card application system and method that would include a multifunction credit card. The system of Cunningham, while originally adapted to automatically apply and activate a traditional credit card would be well served to adapt the system to allow customers to activate the multi-purpose card with multiple functions because many customers would be interested in having this type of card as opposed to many separate cards in an effort to streamline their financial transactions onto one source as opposed to many separate sources. This is the next step in the evolution of the credit card and if the system did not adapt to these changes, customers would seek out a different system that would better suit their needs.

Re Claim 35: Cunningham discloses a real time financial card application system comprising:

Art Unit: 3628

- A first activation activating at least one feature of the multi value card  
(Column 2, lines 9-29; activation is inherent in the acceptance of the offer)
- Allowing the customer to use the multi value card as a card having only said at least one feature (Column 2, lines 24-26). The step of accepting an offer indicates the customers intention to use the features of the cards  
(i.e. credit or debit feature)

Cunningham does not explicitly disclose wherein the value card is a multi value card nor does Cunningham disclose the step of offering to the customer a subsequent activation of the multi value card to add at least a second feature. De La Rue discloses a Visa smart card that will place the functions of several traditional bank cards onto a single microchip (single card). These additional features include a credit feature, a stored cash feature and a rewards program. It would have been obvious to anyone skilled in the ordinary art at the time of invention to include the teachings of De La Rue to the disclosure of Cunningham to create a real time credit card application system and method that would include a multifunction credit card. It would be obvious then that a customer would have the ability to activate the different features that they desire so that they can have a single transaction card that is capable of performing many different functions. If the customer were not offered the activation of subsequent features, then the card would be no better than the traditional card from which the new card seeks to improve.

**Re Claim 36:** Cunningham in view of De La Rue discloses the claimed method supra and De La Rue further discloses wherein said features enable the customer to

establish direct relationships with different companies (Entire article, specifically paragraphs 2 and 4)

**Re Claim 37:** Cunningham in view of De La Rue discloses the claimed method supra and De La Rue further discloses wherein at least one feature offered for activation is a transaction card enabling the customer to establish a direct relationship with an individual company (See paragraph 4; rewards features at particular merchants represent a direct relationship with an individual (particular) company)

**Re Claim 38:** Cunningham in view of De La Rue discloses the claimed method supra and Cunningham further discloses wherein at least one feature offered for activation is a credit card feature (Column 1, lines 15-17).

**Re Claim 39:** Cunningham in view of De La Rue discloses the claimed method supra and De La Rue further discloses wherein at least one feature is a rewards feature (Paragraphs 2 and 4)

**Re Claim 40:** Cunningham in view of De La Rue discloses the claimed method supra and while not explicitly disclosing sending the customer a card imprinted with the customers name in a direct mailing marketing piece, Cunningham does disclose the use of direct mailing for transaction cards (Column 1, lines 15-42) and it was notoriously well known, and therefore obvious to anyone skilled in the ordinary art at the time of invention, to include a preprinted card with the direct mailing information so as to expedite the time in which a customer can actually use the card. Without the preprinted card, the customer would have to wait for an additional piece of mail containing the physical card with their name.

Re Claim 41: Cunningham in view of De La Rue discloses the claimed method supra and De La Rue further discloses the step wherein at least one feature activated during said first activation is a transaction card feature and at least one feature activated in a subsequent activation is a credit card feature (End of Paragraph 1)

Re Claim 42: Cunningham in view of De La Rue discloses the claimed method supra and De La Rue further discloses wherein said transaction card feature includes a rewards feature (End of Paragraph 1).

Re Claim 43: Cunningham in view of De La Rue discloses the claimed method supra and while not explicitly disclosing wherein said rewards are based on a percentage of total amount spent during each transaction, this method for distributing rewards points on a credit card is notoriously well known in the art and would therefore be obvious. In providing this method for distributing rewards points, customers are encouraged to spend more, with the idea that they will “get more back” in return.

**Re Claim 44:** Cunningham in view of De La Rue discloses the claimed method supra and De La Rue further discloses wherein the rewards feature can be redeemed or spent at a specific vendor (Paragraph 4; see dinner entrée example)

**Re Claim 45:** Cunningham in view of De La Rue discloses the claimed method supra and De La Rue further discloses wherein the rewards feature can be redeemed or spent at several vendors (Paragraph 4; “merchants”).

**Re Claim 46:** Cunningham in view of De La Rue discloses the claimed method supra and De La Rue further discloses wherein the rewards feature can be redeemed or

Art Unit: 3628

spent at any vendor or merchant who accepts the logo printed on the transaction card (paragraph 4).

**Re Claim 47 and 48:** Cunningham in view of De La Rue discloses the claimed method supra and De La Rue further discloses wherein the rewards are credited against at least one of the other features of the card (paragraph 4; This essentially defines the rewards feature; purchasing a product with rewards points reduces the secondary credit balance up to the amount of the purchase).

**Re Claim 49:** Cunningham in view of De La Rue discloses the claimed method supra and while not explicitly disclosing wherein the customer must agree to establish a credit account with a payment amount source in order to activate the primary transaction card use, De La Rue discusses the combination of a credit, stored value and loyalty functions onto a single smart card (paragraph 1), which means that these accounts are in fact established with a payment amount source prior to any other use.

**Re Claim 50:** As previously noted in the rejection of Claim 8, the multi function smart card combines the credit (credit card), stored value (debit card) and loyalty functions onto a single card, which establishes the payment amount sources as these particular cards. While not explicitly disclosing that the payment amount source is a check, it was well known in the art at the time of invention that often times a debit card is linked to a standard checking account, from which paper check can be written, and in a sense a debit card is just an electronic version of a paper check.

**Re Claim 51:** Cunningham in view of De La Rue discloses the claimed method supra and while not explicitly disclosing wherein the customer may automatically

Art Unit: 3628

recharge the primary amount source when the payment source is depleted, this step was well known in the art at the time of invention. It has previously been established that the payment source can be either a debit card or a personal check that are almost always linked to a standard checking account a particular bank. The step of automatically recharging the amount source when the payment source is depleted is therefore just a simple deposit of money into the account through an automated means such as a automatic deduction from a paycheck that is normally directly deposited in to the account, a process that was notoriously well known in the art.

**Re Claim 52:** Cunningham in view of De La Rue discloses the claimed method supra and while not explicitly disclosing wherein the payment amount source is the secondary credit card feature, it was established in the rejection of claims 10-12 that the payment amount source may be one of a credit card or debit card. De La Rue discloses that the multi purpose card can have a credit / stored value hybrid card, wherein the stored value card acts as the secondary feature. It would therefore be obvious, through the transitive property, that if the debit card can be the payment amount source as the secondary credit feature.

**Re Claim 53:** Cunningham in view of De La Rue discloses the claimed method supra and Cunningham further discloses wherein said activation steps include the use of telephone, Internet, personal computer means or a combination thereof (Column 2, lines 15-17)

**Re Claim 54:** Cunningham in view of De La Rue discloses the claimed method supra and while not explicitly disclosing mailing a direct marketing mail piece containing

Art Unit: 3628

an inactive multi value card and directing the customer to contact the automated activation process center to activate the card, Cunningham does disclose the use of direct mail marketing (Column 1 lines 15-42), and it was well known in the art at the time of invention that direct mail marketing for credit cards includes an inactive card as well as instructions for activating said card. It therefore would have been obvious to anyone skilled in the ordinary art to include this feature with the disclosure of Cunningham in view of De La Rue so that the additional steps of mailing an active card to the customer can be eliminated, therefore making the process much more efficient.

**Re Claim 55:** Cunningham in view of De La Rue discloses the claimed method supra and while not explicitly disclosing the step of initiating an automatic numbering identification system, this process was old and well known in the art at the time of invention as a way to relate specific customers to a specific transaction card or account. If a numbering identification system were not present, it would be difficult to track customer accounts and also leave customers vulnerable to fraudulent activities from third parties.

**Re Claim 56:** Cunningham in view of De La Rue discloses the claimed method supra and De La Rue further discloses the step wherein said first activation includes offering the customer an option to activate a primary transaction card feature, a credit card feature, an additional feature or combinations thereof (Paragraphs 1-2).

**Re Claim 57:** Cunningham in view of De La Rue discloses the claimed method supra and while not explicitly disclosing the step of updating the processing and statement account records, this step would have been obvious to anyone skilled in the

Art Unit: 3628

ordinary art at the time of invention so as to have an up to date record of customer activities. If the account records were not updated on a regular basis, a customer could, for example exceed his maximum limit.

**Re Claim 58:** Cunningham in view of De La Rue discloses the claimed method supra and Cunningham further discloses an eligibility check (Column 2, lines 11-15; "meet specific criteria"). While not explicitly disclosing wherein the check is to determine whether or not the card has already been activated and what features if any have already been activated, this step would have been obvious to someone skilled in the ordinary art at the time of invention to prevent redundant offers from being sent to customers. If a customer has already activated a particular feature on the transaction card, it would be a waste of time and money to contact them with offers for that same feature. Furthermore, checking on these features will allow the company to solicit appropriate offers to customers since they will have a record of which features the customer does not have as well.

**Re Claim 59:** Cunningham in view of De La Rue discloses the claimed method supra but does not explicitly disclose the step of offering at least one rebuttal offer for activation of a different feature if an offer for activation of a feature is declined by the customer. However, this step would be obvious to anyone skilled in the ordinary art at the time of invention, so that the company can both inform the customer of all potential features and also maximize their potential revenue. The point of offering multiple features on one card is to claim a larger share of a particular customers financial business. If a company did not provide a counter offer to a customer, should they

Art Unit: 3628

decline an initial offer, the company could be losing out on revenue from a different feature that the customer would be more inclined to accept.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy M. Harbeck whose telephone number is 571-272-8123. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hyung S. Sough can be reached on 571-272-6799. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
